

Mobile room divider that cancels echos in Open Workspaces

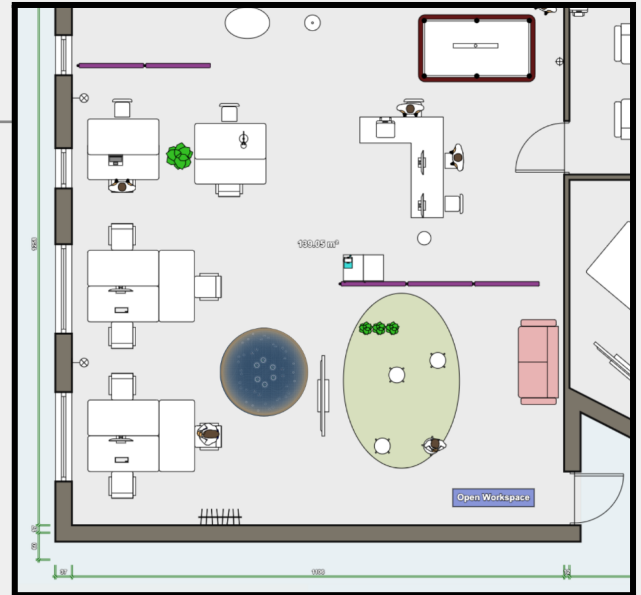

Cancels problematic echos and enhance experience in open workspace

Material: reclaimed wood, raw steel, hemp rope

Dimension: Ø1.90m, 2.0m(H)

What you get

- Noise mitigation up to 12dB
- Visual privacy but still feels connected
- QoL in open workspace

A new approach to noise mitigation

Instead of absorption, irido uses both absorption and diffusion to cancel room echos and balance the acoustics.

Put it anywhere

Irido is Designed for Disassembly (DfD), it means you can take it with you to a new rental when you are forced to move out.

Team building

Great team building activity with our intuitive carabiner system, assembling irido is as easy as LEGO / IKEA furniture.

[Hear it](#) before you buy it

Send us Your office's BIM model and you can hear how it fits in your workspace before purchasing it.

(not) necessary evil

It's not only functional, but it serves as a third place (with plants) for employees to hangout.

Transparency in price and sourcing

We source our materials locally, with transparent pricing on configurable options* to facilitate your needs.
